P C Phanindra Babu Pamdurthy

React & Node Full Stack Developer

+91-8686863173 | phanibabu.babu@gmail.com | Hyderabad

Dynamic Software Consultant with comprehensive experience in the design, development, implementation, testing, and support of full-stack applications. Proven expertise in front-end technologies, Agile methodologies, and industry compliance standards, with a strong track record of delivering scalable and efficient solutions in banking and healthcare domains. Expert in collaborating with cross-functional teams and managing client requirements independently in offshore environments

CORE COMPETENCIES

- Full stack Development
- React.js & Redux Architecture with Node.js
- RESTful API Development & Integration (Node.js, Express.js)
- JavaScript (ES6+) & Modern Web Technologies
- Agile Software Development & Collaboration
- HIPAA Compliance & EDI Transactions
- Unit Testing & Test-Driven Development (jest)
- Code Quality Assurance (SonarQube, ESLint)
- CI/CD Pipeline Automation (GitHub Actions, Jenkins)
- Client Requirement Analysis & Offshore Collaboration

CERTIFICATION

- AWS Certified Developer – Associate

TECHNICAL SKILLS

- **Programming & Frameworks:** React.js, Redux, Node.js, JavaScript (ES6+), HTML5, CSS3, JSON, XML, Express.js
- **Frontend Technologies:** Bootstrap, Material UI, DRY UI, Reveille
- **Testing & Code Quality:**
- jest, playwright, ESLint, SonarQube, Prettier
- **Backend & Architecture:** REST APIs, Oracle SQL
- **DevOps & CI/CD:** GitHub Actions, Jenkins,GitLab
  Tools & IDEs: Postman,JIRA VSCode, Mirth Tool, WinSCP, Notepad++
- **Methodologies:** Agile, Waterfall

PROFILE SUMMARY

- **Over 8+ years of progressive experience** delivering full-stack web solutions with a strong focus on **React.js, Redux, Node.js and modern JavaScript frameworks**, primarily in **highly regulated banking and healthcare sectors.**
- Proven ability to **independently manage offshore client communications**, gather business requirements, and translate them into **scalable, maintainable, and regulatory-compliant solutions**, including expertise in **HIPAA-compliant EDI integrations (834 and non-834 files)**.
- Expert in developing **responsive, component-driven UIs** using **React Hooks, Redux, React Router**, and **DRY UI**, while enforcing **code quality standards** via **ESLint, SonarQube, and jest** for robust, error-free applications.
- Achieved secure integration of **RESTful APIs**, showcasing skills in **API design** and implementation
- **Maintained codebases** with 1000+ commits in Git, ensuring clean and efficient development practices.
- Strong advocate of **Agile methodologies and DevOps practices**, utilizing tools like **GitHub Actions and Jenkins** to build streamlined **CI/CD pipelines** and reduce deployment overhead.
- Effective **mentor and collaborative full-stack developer,** fostering knowledge-sharing within cross-functional global teams and promoting **front-end and back-end best practices** to build scalable, maintainable applications, improve **application performance,** and deliver an enhanced **user experience**.

ACHIEVEMENTS

- Accelerated project delivery timelines by optimizing front-end performance through lazy loading, code splitting, and effective state management techniques in large-scale React applications.
- Played a key role in successful production rollouts with zero post-deployment issues by implementing rigorous pre-release testing, version control, and rollback strategies.
- Improved cross-browser compatibility and accessibility standards across web applications, ensuring seamless user experience in compliance with WCAG and ADA guidelines.
- Collaborated with cross-functional QA and DevOps teams to automate test suites and deployment processes, significantly reducing manual intervention and time-to-market

CAREER TIMELINE

Peoplelink Unified Communications Pvt. Ltd. – Hyderabad, India | September 2017 – May 2018

Valuelabs Solutions LLP – Hyderabad, India | July 2018 – April 2022

Capgemini – Hyderabad, India | April 2022 – Present

WORK EXPERIENCE

Software Consultant
Capgemini – Hyderabad, India | April 2022 – Present
Project: Discover Home Loans (Discover Financial Services – Banking Domain)
Technologies used: React.js, Redux, Node.js, JavaScript (ES6+), HTML5, CSS3, Dry UI, Material UI, REST APIs

- Collaborated directly with clients offshore to gather and analyze requirements, translating business needs into technical solutions.
- Architected and initiated project structure leveraging the latest React JS features, ensuring scalable and maintainable codebase.
- Developed reusable React components with robust state management using Redux and React Context API.
- Implemented responsive UI designs utilizing Babel, React Hooks, React Router DOM, and DRY UI to enhance user experience.
- Executed unit testing with jest and enforced code quality standards through SonarQube and ESLint integration.
- Delivered production-ready code and supported deployment processes adhering to Agile practices

Project: USAA Claims Modernization (United Services Automobile Association–Insurance Domain)
Technologies used: React.js, Redux, Node.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Reveille, Material UI, REST APIs

- Designed and developed scalable front-end modules for an enterprise Claims HQ platform using React 18, React Query, Zustand, and JavaScript, enabling efficient management of insurance claim communications.
- Implemented reusable, responsive, and accessible UI components using the USAA Reveille Design System, reducing code duplication and improving development consistency.
- Integrated RESTful APIs to support claim search, message management, callback workflows, communication reassignment, party association, and copy/move claim operations.
- Collaborated with backend developers, QA teams, and business stakeholders to deliver workflow-driven features, optimize user experience, and resolve production issues in Agile sprints.
- Increased application reliability by writing jest and React Testing Library test cases, maintaining high code quality, improving test coverage, and supporting continuous integration pipelines.

Senior Software Engineer – Software Development
Valuelabs Solutions LLP – Hyderabad, India | Jul 2018 – April 2022
Project: Maxwell Health Insurance (Sunlife Health Insurance)
Technologies used: Javascript,React,XML,MirthTool

- Developed and maintained Electronic Data Interchange (EDI) 834 and non-834 transaction files, ensuring strict compliance with HIPAA regulations using Mirth Tool and XML.
- Enhanced integration processes between insurance providers and sponsors by implementing standardized EDI protocols to reduce administrative costs.
- Facilitated deployment and support of client deliverables across multiple environments.
- Worked closely with cross-functional teams to analyze coding structures and streamline development workflows.

Graduate Trainee Developer
Peoplelink Unified Communications Pvt. Ltd. – Hyderabad, India | September 2017 – May 2018
Project: Global Patient Portal (GPP), Netik Quick Clinic
Technologies used: React.js, Redux, JavaScript (ES6+), HTML5, CSS3,

- Developed secure patient-doctor interaction portals using React, Redux, and JavaScript aligned with industry data security standards.
- Developed and deployed a software update, resulting in a 30% reduction in system errors and improving application performance by 25%
- Applied Agile methodologies for iterative development and continuous improvement.

EDUCATION

- **Bachelor of Technology (B.Tech.), Electronics and Communication Engineering:** Keshav Memorial Institute of Technology, Hyderabad — 2016

PERSONAL DETAILS

Date of Birth: 18th June 1994 **Languages Known:** English, Hindi & Telugu
